

Designers have equipped the trailer's side with removable panels. As a result, it allows easy access to internal cargo, making loading and unloading more efficient. In addition, one can disassemble or open the panel. Therefore, this trailer provides more flexibility for trailer loading and unloading. What's more, hidden twist locks equip the trailer. Therefore, that meets the transportation of containers while transporting bulk goods.

One can remove the trailer's side walls, front, and rear panels. After all the panels are disassembled, it becomes a flatbed trailer. As a result, it can transport some oversized goods and containers.

SPECIFICATION&DRAWING

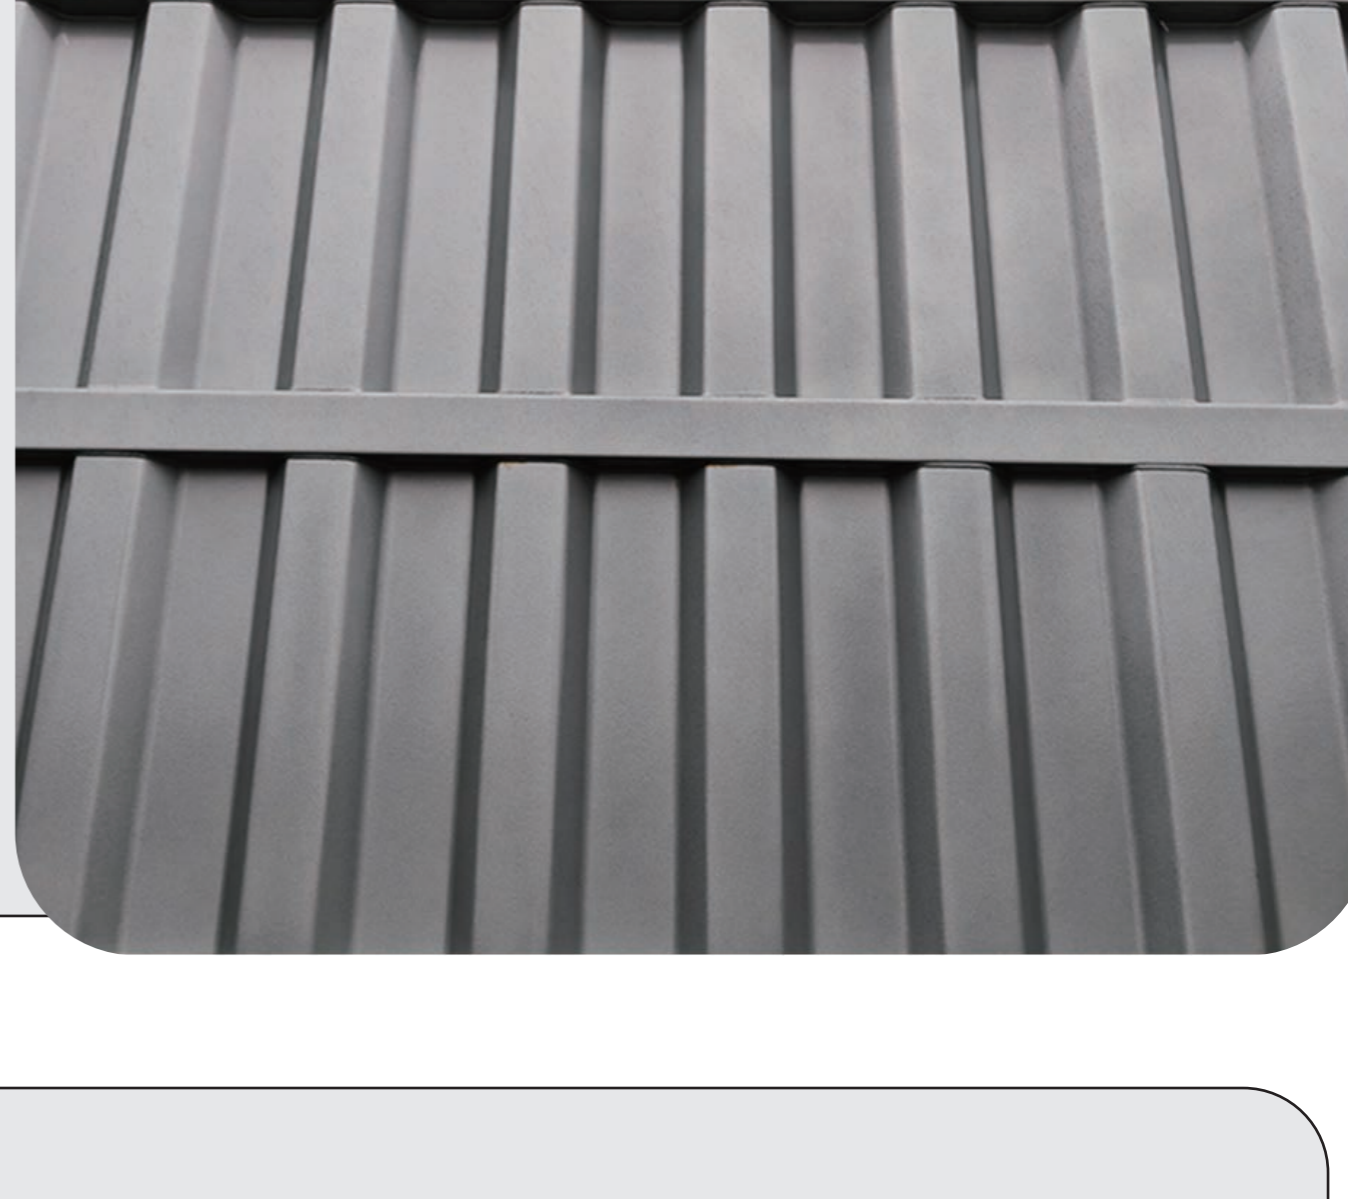

Specification	
Overall Length:	12,500mm*2,500mm*2,300mm
King Pin Setting:	1,420mm
G.V.W.R. :	40,000 KG
Side Wall	
Side wall Height	600mm
Material	Corrugated Board
WALKING SYSTEM	
King Pin:	2.00"/3.5" Made of wrought iron Bolt-In/Weld Type
Landing Leg:	25tons Landing Leg; Static bearing capacity 60 tons Double Speed Telescopic, Manual Uses The Mechanical Bear Side Landing Leg, Operated Manually.
Axles:	13 Tons*3 pcs; YIHAI Brand/Other Brand Optional
Suspension:	Mechanical Suspension with Leaf Spring (13*90*10 pcs)
Tyre:	12R22.5*12 pcs(10 Holes); LINGLONG Brand
Rim:	9.0*12 pcs (10 Holes)
Toolbox	International Standard*1 pcs

DETAILS OF TRAILER

Removable Side Walls

Side wall trailer body including side walls, columns, etc. can be disassembled so that it can transport various types of cargo. When the side walls are removed, wood, steel pipes, etc. can be transported, and when all the upright columns are removed, containers of different sizes can be transported.

Various Types Of Reflective Devices

There are yellow reflective stickers on the lower side of the trailer's side wall and on the tail.

In addition, there are red and white stripes and yellow staggered reflective devices in the middle and lower part of the tail to make the trailer safer when driving at night.

Heavy Tool Box

A heavy-duty, large-capacity tool box is placed on the left side of the trailer. The trailer is also equipped with two open tool boxes to facilitate the placement of on-board tools and easy access.

Rope Tighteners And Rope Hooks

Each side of the trailer is equipped with 5 automatic rope tighteners and integrally cast rope hooks for bundling and fixing different goods. In addition, rainproof and dustproof tarpaulins can be installed on the top and sides of the trailer to protect goods that are susceptible to moisture.

Specific applications of sidewall semi-trailers in the transportation industry:

- 1. Agriculture and animal husbandry:** Side wall semi-trailer can be used to transport agricultural supplies such as crops, feed, and fertilizers, as well as livestock products such as poultry and meat.
- 2. Construction and real estate:** Sidewall trailers can be used to transport construction materials, such as cement, bricks, steel bars, etc., and can also be used to transport various equipment and tools in the real estate development process.
- 3. Logistics and Express Delivery:** Sidewall semi-trailers can be used to transport various types of goods, such as household appliances, electronic products, books, food, etc., making them an ideal choice for the logistics and express delivery industries.
- 4. Retail and Wholesale:** Side wall trailer can be used to transport various types of goods, such as clothing, shoes, cosmetics, etc., and can also be used to transport wholesale supplies, such as beverages, food, etc.
- 5. Special cargo transportation:** Some special cargoes that require higher loading and unloading requirements and require extra space, such as special-shaped products or flexible packaging of goods, are also suitable for using side wall semi-trailers.

One can remove the trailer's side walls, front, and rear panels. After all the panels are disassembled, it becomes a flatbed trailer. As a result, it can transport some oversized goods and containers.

Date : 2023/07/20

Dear Sir/Madam,

Notification of Filing Particulars

1. Intellectual Property No. of your Form TM 3 together with enclosures lodged on 14 July, 2023.

Reference to the filing particulars:

Reference No. :	IPH12012023
Filing Date :	14 July, 2023
Trade Mark No. :	7023247
Class (Int.) :	12
Mark Details :	TM

Name & Address : Shandong Huibao Heavy Industry (China) Co., Ltd. of Qian Pu Zhen Sheng
Shandong Co., Langfang County, Langfang City, Shandong Province, China

Please quote both the reference number and the trade mark number in all correspondences, when making inquiries or payments relating to this application.

Yours faithfully,
HONGKAZA WANG HONG JIAWANG
Deputy Registrar

Nation - Religion - King

Filing Fee : \$500.00
Stamp Fee : \$50.00

APPLICATION FOR MARK REGISTRATION

APPPLICANT: Shandong Huibao Heavy Industry (China) Co., Ltd. of Qian Pu Zhen Sheng Langfang County, Langfang City, Shandong Province, China

Legal Mark Agent: [Name, Address, Email]

Particulars of Mark: **TM**

Meaning: No Transition

Class No: 12

Details of Specification of Goods/Services: Electric vehicles, parts for electric vehicles, electric suspension systems, air springs, air shock absorbers, suspension shock absorbers for vehicles, shock absorbers for off-road vehicles, shock absorbers for off-road vehicles.

FAQ

1. What uses is Side Wall Trailer suitable for?
---Side Wall Trailers are commonly used to transport a variety of cargo, including large cargo, bulk cargo, lumber, building materials, etc. Due to the removable side panel design, it is ideal for situations where side loading and unloading of cargo is required.

2. What are the sizes and specifications of this trailer?
---Side Wall Trailer sizes and specifications can vary depending on the manufacturer and model. Generally, they come in different length, height, and load capacity options to suit different transportation needs.

3. What is the maximum load capacity of Side Wall Trailer?
---Maximum load capacity depends on trailer design and configuration. Typically, the maximum load capacity of a Side Wall Trailer ranges from several tons to dozens of tons.
